What's New in the Directory File-chooser Tool?

System Requirements:

To run, this mod requires you to have Minecraft Forge installed and working. You can download Forge here. Installation: 1. Install the mod by dropping the Mod folder into your mods folder (usually located at /Users/{username}/.minecraft/mods/). If you don't know how to locate your mods folder, open up your Minecraft launcher and select "Open Directory...". 2. If the mod's.jar file has been replaced by a Forge.zip file (note: you still need to unzip it first), you can either edit
